News and information

Our next trip is to Eucumbene. – January trip – Eucumbene was edging to just under 35%. Lake level today – 28.13% - it has dropped 0.65% over the past week. Anybody has Maxtrax – I would suggest taking them. If attending and you have not already done so please advise Adrian. Target species for the weekend is trout. There will be a meal on the Saturday evening in the lodge along with a bbq on the Sunday weigh-in.

Eden next year will be the weekend of the 17th to the 21st March. The rest of the calendar will be finalised shortly.

A big thankyou to those who attended the AGM, it was good to see the numbers. The only change to the committee is that I am now the secretary treasurer.

Well done to Ed Merrett on being awarded life membership of the section. It shows the faith the section has in the committee when you consider that all but two current committee members are life members of the section. Life membership of the section is granted after 15 years as a member of the mother club and 10 years on the committee of the section. Well done Ed.

Dartmouth had 13 members attend what was a spectacular weekend weather wise. Colour did not seem to overly matter but yellow/orange, orange/white, pink/white and even bright greens all produced fish from the surface to 50 feet down. Speaking of down, there was a lot of discussion on depth and Kevin has kindly provided a web site and some information on using leadline, see page two. 44 fish were presented at weigh-in with a couple of outstanding fish amongst them. Well done to Graham and Brian.

Ladies best catch of fish, Chris, 4 fish, 1.22kg

Ladies best fish, Nola, 310gm

Men's best bag, Gus, 8 fish, 3.61kg

Men's best brown, Graham, 860gm

Men's best rainbow, Brian, 710gm

Consolation prize, Ed

Well done to all who weighed fish.

Happy birthday to the following member/members: Colleen, Wendy and John.

Memberships for 2021/22 are due, please pay promptly.

Committee 2019—2020

President	Adrian Kent	58 Firestone Way Wodonga	6059 3765
Vice President	Jeff McEachern	14 Cole Court Wodonga	60242473
Hon. Secretary/ Treasurer	Ian Guthridge	12 Garnett Circuit Wodonga	0458746577
Committee	Ed Merrett	60 Greentree Way West Albury	60411199
	Gary Williams	861 Miller St Albury	0408664690
	Bruce Williams	11 Hampton Crt Wodonga	60247370
	Dirk Colville	1 Nigel Court Albury	6025 5625

Calendar 2020-2021

7-9 May 21
20 June 21
July

Eucumbene
Lake Hume, Dinner at club)
Interclub Dartmouth

The following is an excerpt from the below website. The full article is well worth the read, all be it written for the American fishing scene, the information is still true for us.

Remember that the driver behind this is depth, and if you're using Sufix Advanced Leadcore, your dive is 7-feet per color, and various forms of standard leadcore 5-feet per color when trolling around 2mph. Pull faster, and you raise approximately 1 foot for every 0.2 mph in speed, pull slower, the same is true in reverse. From there, add the depth of your crankbait depending on the length of your leader. Long leaders make for a truer dive depth as advertised on the package. Shorter leader lengths in the 6 foot or so category, and you're only going to get an additional foot or two of dive. For example, if I'm running a #5 Shad Rap on 3 colors of Advanced leadcore at 2.2 mph with a 6 foot fluorocarbon leader, my math would be as follows:

$(7' \text{ per color} \times 3 \text{ colors}) + (2 \text{ foot crankbait diving depth}) - (1 \text{ foot for } 0.2\text{mph speed increase}) = \sim\mathbf{22\text{FOW}}$ (feet of water)
