News and information

Our next event is Eildon 11-13 Aug staying at the Bonnie doon lake side leisure resort. Web address is

[Bonnie Doon Lakeside Leisure Resort | Holiday Cabins, Camping, Motel](#)

Target species for the weekend will be trout, yellow belly, cod, and redfin. Names to me by Tuesday the 8th please to allow for catering. Cost for the weekend is \$20.00 per head.

I had some dates in this incorrect last month. They have been amended. Those attending Eden next year need to contact them to ensure the correct dates are booked. Dates for the weekend are 16-18 March. Most arrive on the 14/15th and most will leave on the 19th.

Last month 9 of us went up to Dartmouth to try and maintain the interclub trophy, Catching fish was easy and I know of three anglers who managed to boat over 25 fish each. Most were thrown back due to the 35cm rule for the club and event. No colour stood out with fish being taken on eruptions, pink stings and even hard bodies. Fis were down deep though with most taken on three colours of lead and down riggers to 50 feet.

Results for the interclub are as follow:-

Ladies best catch of fish, Nola, 1.928kg 5 fish

Ladies best brown Kerrie (Alpine anglers) 586gm

Men's best bag, Adrian, 4.766 kg, 10 fish

Men's best brown, Steve (Alpine anglers) 816gm

Men's best rainbow Ron (Alpine anglers) 680gm

Children's best bag, Dan (Alpine anglers) 730 gm

Children's best fish Henry, (Alpine anglers) 356

Interclub result Commercial club 10050gm, Alpine anglers 9524. Winners Commercial club.

Well done to all who caught and presented fish.

Happy birthday to the following member/members: Les, and Kathy

Memberships are now due for the 2023/24 season. Please pay promptly.

Narrandera Hatchery Sets Murray Cod Record – Again!

For the second year running, the expert hatchery team at DPI's Narrandera Fisheries Centre have produced and stocked record numbers of Murray Cod. A total of 1.286 million juvenile Cod were produced at the Narrandera facility in the 2022–23 season, eclipsing the previous record set in 2021–22. This outstanding result will complement natural recruitment and help maintain strong populations of these iconic native sportfish in key impoundments and associated river systems. As with previous stocking seasons, the Murray Cod fingerlings produced at Narrandera included progeny of fish rescued in a joint operation involving DPI Fisheries and volunteer fishers during the 2019 drought, as part of the NSW Government's \$10 million Native Fish Drought Response. DPI has partnered with the inland aquaculture sector and local recreational fishing groups to trial the stocking of "advanced-sized" juvenile Murray Cod which measure 200-300mm compared to a traditional fingerling of about 30-50mm. This project has been undertaken to assess the effectiveness of selectively releasing larger sized Murray Cod to help fast track recovery of inland waterways affected by natural disasters. The tagged fish will be monitored by DPI researchers using state-of the-art electronic tracking systems.
